

Spring 2011

Dear Patient:

I am writing to tell you about an important research study we are currently conducting for people with Systemic Lupus Erythematosus (SLE).

As a participant in this study, you will receive study-related medical care, regular study check-ups, and study medication at no charge.

If you are interested in learning more about this research study and would like to see whether or not you may qualify to participate, please call the study coordinator, Kimberly Emmons, RN at (574) 647-7883. The study coordinator will be able to tell you more about the study and answer any questions you may have. By choosing to participate, you are helping others by contributing to medical research that can help doctors learn and answer questions about the safety and effectiveness of this experimental drug therapy for the treatment of lupus.

We look forward to hearing from you soon.

Sincerely,

Dr. Nicholas R .Straniero
