

The next step in rheumatoid arthritis research

Do you have rheumatoid arthritis?

Are you taking a rheumatoid arthritis
medication but still have painful, stiff
and swollen joints?

If the answer to these questions is yes, and you are
18 years of age or older, you may be eligible to participate
in a clinical research program evaluating a new investigational
medication for rheumatoid arthritis.

For more information, or if you are interested in taking part in
the OSKIRA Program, please contact:
